PROFESSIONAL SUMMARY

Accomplished **Java Spring Boot Developer** with **3.5 years** of experience at Cognizant, specializing in **Microservices and REST API development**. Skilled in data transformation, **SQL**, and **Spring Cloud** with strong enterprise level application development and problem-solving abilities.

TECHNICAL SKILLS

Languages	Java (Core & Advanced), SQL
Frameworks	Spring MVC, Spring Boot, Spring Data JPA, Spring Batch, Apache Kafka (Basics)
Microservices & API Development	Microservices Architecture Design, RESTful APIs, Spring Cloud, Service Discovery, API Gateway Inter-Service Communication.
Database & ORM	MySQL, Oracle SQL , Hibernate, JPA
Version Control & Collaboration	GitLab, JIRA

PROJECT EXPERIENCE

Java Spring Boot Developer, Cognizant (June 2022 – Current):

- Working as a Java Spring Boot Developer at Cognizant for the past 3 years, handling projects for Emblem Health, a US-based health insurance provider.
- Primary role involves developing and maintaining batch and real-time applications to automate email and letter communications.
- Specialize in microservices architecture, designing and developing RESTful APIs using Spring Boot to enable seamless communication between different services.
- Work with data transformation, converting raw input files (XLS, XLSX, TXT, JSON) into structured XML using JAXB, which is consumed by Quadient Inspire for generating emails, invoices, plan updates, and welcome kits.
- Develop and optimize Spring Boot microservices, integrate them with databases, implement caching mechanisms, and ensure efficient inter-service communication.
- Focus on error handling, logging, and performance optimization in batch workflows while providing production support to maintain smooth operations and troubleshoot issues effectively.

Intern Trainee, Cognizant (Jan 2022 – May 2022):

- Assisted in developing **Spring Boot** applications by implementing controllers, services, and repository layers under senior developer guidance.
- Worked on **REST API development**, including request/response handling, validation, and exception management.
- Gained hands-on experience in **SQL**, writing queries, creating tables, and integrating databases with Spring JPA.

EDUCATION

Bachelor of Information Technology - RMD Engineering College, Chennai (2018- 2022)

GPA: 8.1 CGPA
